

U.S. Industry Report

Information Technology and Analytical Instruments Cluster

The Information Technology and Analytical Instruments cluster represents subclusters such as Electronic Components, Computers and Peripherals, and Software Publishers. This cluster includes a variety of industries ranging from Semiconductor Machinery Manufacturing (NAICS 333295) to Electromedical and Electrotherapeutic Apparatus Manufacturing (NAICS 334510). As of 2016, there are **21,040 establishments** across the United States that employ **1,148,065 professionals**, earning an **average annual wage of \$114,685**. The following three states offer high employment specialization *and* share.

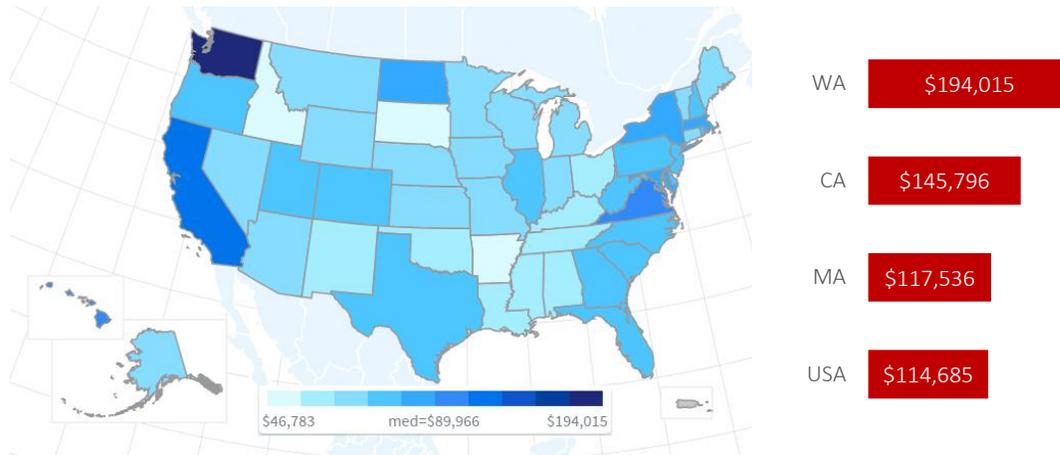

WASHINGTON	MASSACHUSETTS	CALIFORNIA
Location Quotient 3.2	Location Quotient 2.3	Location Quotient 2.0
Establishments 711	Establishments 1,064	Establishments 4,632
Employment 82,339	Employment 67,654	Employment 272,112

Definitions

Cluster – A cluster is a regional concentration of related industries that arise out of the various types of linkages or externalities that span across industries in a particular location.

Establishment – An establishment is a single physical location at which business is conducted or services or industrial operations are performed. It is not necessarily identical with a company or enterprise, which may consist of one or more establishments. When two or more activities are carried on at a single location under a single ownership, all activities generally are grouped together as a single establishment

Location Quotient – A location quotient greater than 1 indicates a higher than average cluster concentration in a location.

NAICS – The North American Industry Classification System is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

High Employment Share – States with high employment *share* rank among the top 10 percent of states with employment information by number of employees in an industry.

High Employment Specialization – States with high employment *specialization* have a location quotient ranking among the top 25 percent of states with employment information for an industry.
